

## TESTIMONIALS

An abstract of her feedback is as follows:

"According to my point of view, the materials provided by the teachers are very helpful. The materials issued to us are not from the books, rather they are written in very simple language. These materials helped me cope with my exams. The teachers at KH also conduct regular tests, which help me to judge myself; discussions are also done by the teachers. They also conduct extra classes in which we can clear our doubts. This made me score good marks in the exams."

Varagini — Class-XI (Accounts)

"The Physics classes were extremely informative and entertaining. The faculty focused on basic concepts and fundamentals, something very important in application questions. His assignments and surprise tests were designed to challenge the brain into thinking a little sideways while retaining the feel of a CBSE syllabus based paper. The PowerPoint presentations and slides helped in the lessons by giving good diagrams and conceptual points. I recently gave my XI Physics Final Term exam and needless to say, nearly all the questions were discussed in class. For the 4 months that I spent in the class I had no issues with the lessons, the teaching style or the presentations."

Pratyush Joshi — Class XI (Physics)

"I would like to personally thank the efforts taken by the GK II Centre team and a special thanks to the Maths faculty for helping my son achieve unbelievable marks in his exam. He has been a student who was never interested in Maths and inspite of going to other tuition classes he would not fare well (he used to attend FTC). After seeing the deterioration in his performance I decided to admit him to KH in middle of the term though there were reservations from the family. But today after seeing the marks he has achieved and his interest in the subject has made me believe that my decision was right and that we deliver what we promise to our students."

Cheers to the KH Team  
Shilpa Saxena (parent of Siddharth Saxena)  
Marketing—Corporate  
New Horizons India Ltd

"The way of teaching at Knowledge Horizon is very effective and impressive. The teachers adapt their teaching style to the needs of the students and help in better understanding of the concepts. Thanks to the management and faculty of Knowledge Horizon for providing a good learning environment."

Neha Sarin, Sangina, Pranjal, Jatin, Aditya, Ashim and Huzaiifa — B.Com (Pass) students

"I have been studying Economics and Maths at Knowledge Horizon since October. The best part of this institution are its teachers as they focus not only on the content but also the way it should be taught. My teachers helped me to learn the basics properly and made

the subjects interesting. I feel confident and have been able to score really very well in my Economics presentation in College. The faculty's good teaching skills, their good nature and friendly attitude, along with regular assignments and tests, have helped me in gaining confidence and in making my base stronger in Economics and Maths.

I would like to say that the whole management is doing a really good job which will help in shaping the future of students. It is not only using an education centric approach but also targets the personal development of its students."

Deepika Sood — B. Com (Hons) II Yr

"I have been part of this Institute since November 08. I enrolled myself for Accounts, Economics and Statistics. The best part of this Institute is its atmosphere which is perfect for studying and acquiring knowledge. Digital Board is a very useful feature introduced here. The faculty is excellent. They are very friendly and teach in the way best suited for understanding. They make the whole studying process a lot easier and enjoyable. In addition to studies, there is always an element of humour in the classroom which keeps the environment comfortable. This Institute is flawless. I am glad to be a part of it."

Akshay Sharma — B. Com (Hons) I Yr

"I have enrolled at Knowledge Horizon for Accounts, Economics and Statistics. The teachers here are very caring and teach with full determination and sincerity. I respect them a lot for guiding and inspiring me and showing me the right path. The Institute is very well decorated and has very good facilities like the Digital Board, comfortable chairs, clean classrooms, etc. My teachers tell me to 'party hard' but 'study harder'."

Mehak Khosla — B. Com (Hons) I Yr

"We have been part of Knowledge Horizon since September 08. The experience till now has been good. We enrolled here for Financial accounting. The teachers have guided us all through. They made learning an enjoyable and fun-filled experience. The atmosphere is very suitable for studying and concentrating. We are very glad to be a part of Knowledge Horizon."
